

FORUM

STRUCTURE SPECIFICATIONS

Clear Span: 20m, 30m

Eave Height: 4m

Ridge Height: 5.9m

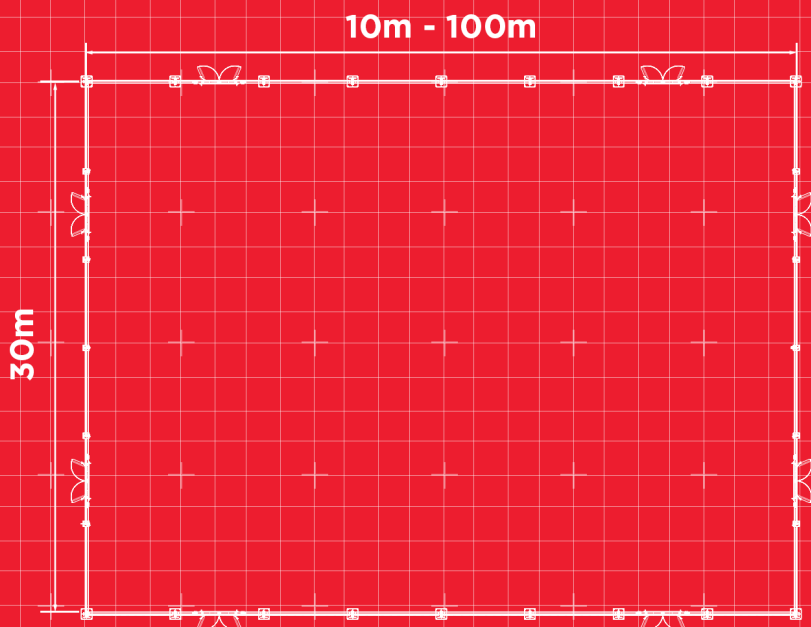

Wind Loading: 100km/h

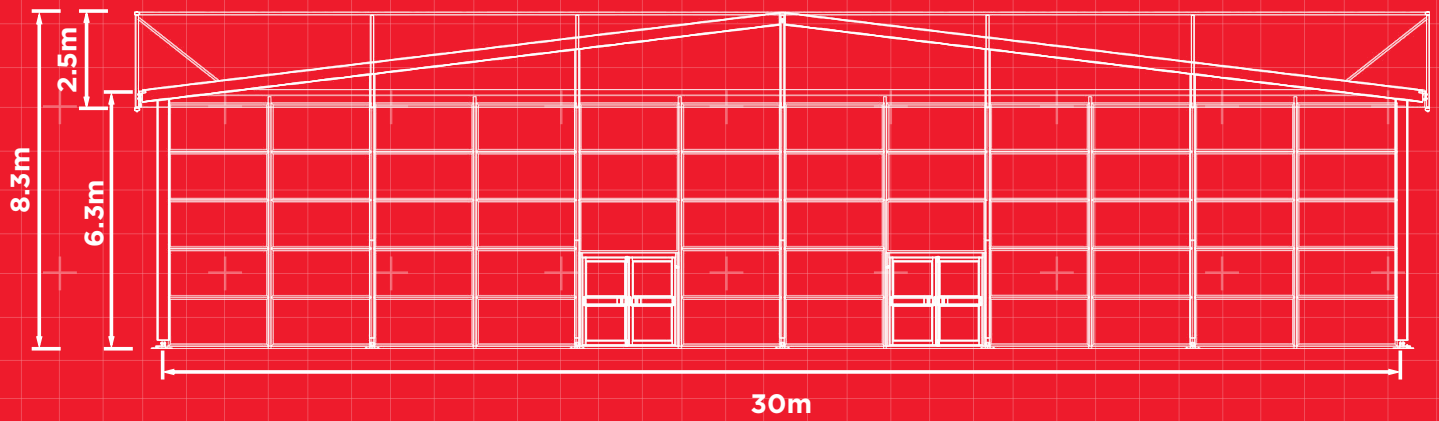

Roof Options: Thermo Insulation

Walling: Horizontal ABS Panels, Horizontal Glass Panels

Rigging: 150kg (1 point)
350kg (3 points)

The Forum is Wicked's newest structure line, launched in 2022 for the World Cup in Qatar. The Forum provides a premium, flexible solution for large clear span, high-leg temporary buildings. With its low roof pitch and integrated branding parapet, the Forum blends the versatility of a relocatable structure with the aesthetics of a permanent building. The branding parapet is fully integrated with the system, offering the ability to fully customize either the upper portion of the structure, or if required the entire structure façade.

Clear Span: 20m, 30m

Roof Options: Thermo Insulation

Eave Height: 6.3m

Walling: Horizontal ABS Panels, Horizontal Glass Panels

Ridge Height: 8.3m

Wind Loading: 100km/h

Rigging: 120kg (1 point)
250kg (3 points)
